EXPERIENCE

S&P Global Software Engineer

London, UK
September 2024

Return from internship.

S&P Global Software Engineer Summer Intern

London, UK
June 2023 - August 2023

Full stack engineering of various web applications in the financial risk analytics sector.

Led the research and implementation of a data manipulation algorithm for risk reporting with user-defined hierarchy constraints. The web applications stacks included **Vite**, **React**, **SQL**, **NodeJS**, **AWS** and an in-house components library styled with **SCSS**.

Sky (Comcast Corp.) Software Developer Summer Intern

Osterley, London, UK
July 2022 - August 2022

Full stack development and deployment of two internal web applications designed to broaden employees' skills. The two stacks included **Docker**, **React**, **Java Spring-Boot**, **ExpressJS** and **SQL**.

TSYS (GlobalPayments Inc.) Software Developer Summer Intern

Knaresborough, UK
July 2021 - September 2021

Built and released an internal **DocOps** solution to store new documentation and automatically convert existing technical documentation to **Markdown** using **Python**, **Docker**, **AWS**, **GCP** and **Terraform**.

TECHNICAL SKILLS

- C: 2 years.
- Rust: 1 year.
- JavaScript/TypeScript: 3 years.
- Java: 2 years.
- Python: 4 years.
- SQL Databases: 3 years.
- Docker: 3 years.
- Cloud (AWS, GCP): 3 years.
- Unix systems: 4 years.
- $\text{\LaTeX}$: 4 years.

LANGUAGES

- **English** Fluent - IELTS Academic (British Council - Cambridge University) 8.0 Overall band.
- **Italian** Native speaker.

EDUCATION

University of York **York, UK**
MEng Electronic and Computer Engineering **October 2020 - June 2024**

Classification: 1st class honours (with distinction) 82% overall.

Dissertation (81%): "*Visualising Many-Core Systems*". Developed a portable **GUI** program, written in **Rust** and **React**, that generates **SVG** representations of a Many-Core system from user-provided system simulations.

Achievements: Yorkshire Philosophical Society Malden Owen Award for the best graduating student on an MEng programme.

Relevant modules:

- Systems Programming for ARM: 80%.
- Machine Learning and Computational Intelligence: 76%.
- LAN & Internet Protocols: 95%.
- Algorithms & Numerical Methods: 88%.

Activities:

- York Engineering Society: Treasurer and website administrator. Organised community events to render engineering topics accessible to non-engineering students while looking after the society's finances.
- Nouse: Technical director. Redeveloped the society's website from the ground up. Nouse is the University of York's oldest society and one of the most highly respected and nationally acclaimed student newspapers.
- Student Ambassador: Provided insights regarding life as an engineering student to hundreds of visiting prospective university students.
- Course Representative: Elected by peers to serve as the voice of the Electronic Engineering cohort in the student-staff liaison committee for three consecutive years.
